AN ARBEAT, NO SEPANTE OF COLPUNEO MATION FOR SURANGERS. COLORADO.

To horrow the exposing of a well-known writer, the Territory of Coloracy structures the Rocky Romanus like a saddle—a part of it leads on their destern trank, a part on their western flank, and a part of it being laken up by her barniers of west longitude, being Sounced on the north by Wyoming and Ne stasks, and on the cast by Nebraska and Kansas, and on the south by New Mexico, and on the cast by Unit. The area embraced forms searly a square, continuity about 10%, 73 square miles, or (7,420,000 acres —a greater extent of country than all o Gleat Britain, with a colony or two included, and quite is large as New York, Pennsylvania, and Massachuseits, with New ersey thrown in for good measur: "

For many reasons, Colorado is one of the most remarka-hle sections of country on the face of the earth. Though not geogr phically, it is, really, the centre of the corth American Continent. Up to its guant peaks, there is a gradual skyle on very side, from he Atlantic on the east, the Pacific on the west, the thill of Mexico on the south, and the confines of the Polar Sea on the north.

The dwellers on its "plane" or lower lands, live, on the average, about a mile along the level of the sea; whilst those who live in its "incomena towns," are lifted still

presument of corrected strong and the desire of the regard of the surface of the result of the results of the r a charm upon the system, aprigorating the bodily powers and finite or constant though spirits. The cryptes and party of the aim sphere render it especially suitable for arter from any affection of the throat or bings, suchtasless the draw to has obtained too furn a grap-arealmost coman to region health and trength.

Three miles from town is the wonderful and famous to Garrier of the tooks," in who i huge risks, hundreds of forthigh, and of the most famoust shapes, and gingeous objections is a scene which the residence winds risk who there is a scene which the test the winder of all who behold it is took to the Gorden's "Glen Eyr e." within a cheen's to men, equally wood of it and heapthin. Ever miles to the continues of the town is "Cheverus Canon," it a magnificent gorge, whose stirt ndoes walk of rock and I begantial waterfalls give it an a roost increase I grandour. I welve miles north is "5 onum int. Park," since ed with groups of lofty columns of andstone, which look like observable of one by gonerace of giants. Immediately beyond Maniton, are the Rambow Glen, the Canonian Ealls of the Frantiam, and the Ute Pass, Indeed, in all directions, are stones of grandeur and of beauty. "The advantage of this point," says a fevent writer, "is that is less you at once into the heart of the brountains."

The Springs and the Scenery combined are destined, of themselves to build no a to yo of considerable size and unportune. Here will bearlice ef recort-of an est unequaled attractions-known the world over Last year brought thousands of visito's, from almost every State in the Union, and from foreign lanes, and each succeeding season will bring an increasing thring; whilst many, who are in search of realth, have already chosen its, their permaneut home, and many more will settle here it order to we use the same mestimable boon.

Everything possible is being done to heighten the at-f-tractive character of a soot in which Nature has bestowed. o many advantages—the intended to make Colorado Springs not only famous as a Sanitarium, but a co as an educational centre, and a home of renned success. Some reservations have been made for so tooks and knot red institutions, and the Town, although still in its infinely, that undertaken the erest on of a cost school house streets and avenues and ispacious squares have been late, out, and thousands or rees have been planted.

COLORADO SPRINGS. .

The town of Colorado Springs is situated in the centre Pass opens monthle plains.

It is a principal station on the Denverguel Rio Crande seventy-un mi es walls o l'enver i le metrop lis of the Territory , and forty-two miles nort of heblo. he from takes its name trum misherous valuable him etal aprings in the immediate neigh bethood. The most niportant of these are grouped together about five sules to
the west, in a beautiful glen, to which has been given the
name of Nanitou. These are the delebrated "soiling
Springs," which, years ago were made onewn other
springs, the thousand the second of the soiling
springs, the thousand the second of the soil of the second spring." which years ago were made thown o the world by Fremont, Ruxton, and other writers. Comerly they were visited on account of their medicinal virtues by the native tribes of Indians, who regarded them as super natural phenomena caused by the direct act on o Great Spirit. 'n latter times, notwi-ustanding the difficulty of access to them, their fame has attracted large num-bers of invalue, annious to avail themse ver of the realing waters, ...)uring the last two year, a large amoun has be expended in aying oil and aborning the ground in the neighborhood; landsome, contractions, and, comortathe house have been burt, but house have been fitted up, and many other conveniences provided. Now that these famous aprings are so easily accessible, and it at every prevision has been made or the conduct of white is, there can be no could that a lew years wit suffice to make them a attractive a point as a Sarrings of the many within a start of them every year, and many within the permanent abones around them. The prints are deven in attractive, and are use a both for criming and bathing purposes, been a righly benefician or removation, and concerns general celosity, and numerous of or failments of which we need not can neue. the hotels have been burt, but I to uses have been fitted up,

In act ition to these wonderful surings, some of the most remarkable and magni wont conery on the Amer can Contiment is in proximity to the lown.

Amule funds will accumulate to easi? on the work of beautifying the town, of creating public middings, and of constructing necessary public works. The caun is a Citony Town, and the whole of the profester with som the sale of the Colomy Loss and saids, are inspringed to public improvements. The land having seen "nught of large parcels at ow rates, and being out to obtain a small bits at advanced figures, many thomsands of dollars will thus be develed to too surfaces cames."

will thus be devoted to toe purposes names.

Persons may become colonists by purchasing rer ificates.

too feet, ranging in prices from \$100 to 1250. "Residence Lots," to feet by 190 feet, and 100 feet av 190 feet, ranging in prices from \$50 to \$150. "Outlyin, True \$," of the fee owing sizes and prices: One-acre tracts, \$430. fiveto owing uses and prices: One-acre tracts, \$450; averacre tracts, \$450; ten-acre tracts, \$100; his his acre;
twenty-acre tracts, \$50 to \$40 an acre; cryy-acre tracts,
\$15 to \$20. A \$50 certificate multies to holder to allocate a:
\$10 residence lot: a \$15 certificate, any residence, but is respective of price; a \$150 certificate, to locate a misiness;
and residence lot, or a business lot and outlying track, or a
residence lot and outlying tract, provided to total value;
of the holds have does not attend outlying acre. of the lands located does not exceed >300: # \$200 certifimite, on locate similar lots as the previous, but irrespective price. The amount paid for the certificate is wed for the lots located, and the bilance of the value of the lots exceeds that of the certificate, can be and any time; within twelve months of the location or of the free location, if more than one is made upon the some are infection. Members may take out as in my, certificates is the pylesse, but are boune to make one improvement it sit is again to a house, or make some equivalent expenditure for each certificate, within four months of making the trix location infon it. Thou has being done and payment of the lots completed, deeds are given conveying lid trife, with one constraint, incorrect at no intoxicating intore shall

consition, however—that no intoxicating rights shall ever he sold on such lots it any premises having he character of a place of mildic resur, breach of this goadition, in olves forfeiture of the property.

The lands about the Town, of which the Colony possess about 10,000 acres, are excellently adapted for bustration. A great portion is almost as flat is a table, with an exceed my y slight slope, so that it can be irrighted with the cumos facility. Irrigating remais have been consert at ed. and large reservoirs for the purrous of estoring water as an infacility. Irrigating remails have been constructed and large reservoirs for the purmee of storing water as an in and the sor are especially somable for the critication of small fruts, and for these a ready marker will be found. In addition to the supply required by the found, and by the miles not far away, a campany has been brined for the purpose of establishing a Canning 'actor in the 'own so went as he quantity of fruit grown sind exceed the home come amption.

the progress already made by the Liwn, has been astonishing y rapid. In to date—that is, list e more than two years from the commencement of the interprise tree late been so occutionates of men benship taken out, on most of whice two locations have be a maje. The polulation, according to the nearest extract, we can form, is between twenty and twenty-five lundred. The various institutions necessary to a well ordered community, have been quakly got into working ouer. here are two charches built, two in course of erects, i. and two or there others centemplated, a graded public school with for teachers, and about three hindred scholars, two newor teachers, and about three nimited schools. Use newsoarers and printing offices, post office, the graph office, i. S. Signa office, two bails, several large hotels, stores of all kinds, well stockeil—where the hourses as well as the necessures of hierarcheolic innert—hiery at bles, etc. The fown has been organized with trustees and other officers, and several companies have been faints, for the m-igrafahan lain-somme manadan la montrosterd nam-daird, abintropo selya in llum-was maste a gunulin ufacture, fruit-canning, etc. In short, the basis has been well late for growing progress and primperity
